

## Layout:

All man pages follows a command layout that is optimized for presentation on a simple ASCII text display, possibly without any form of highlighting or font control, sections present may include:

### NAME

The name of the command or function, followed by a one-line description of what it does .

### SYNOPSIS

In the case of a command, you get a formal description of how to run it and what command line options it takes. For program functions, a list of the parameters the function takes and which header file contains its definition. For experienced users, this may be all the documentation they need.

### DESCRIPTION

A textual description of the functioning of the command or function.

### OPTIONS

All options used by the command are listed in the OPTION section.

### EXIT STATUS

Which lists possible error conditions and their numeric representation

### EXAMPLES

Some examples of common usage.

### SEE ALSO

A list of related commands or functions.
